Contents

Contents . . . . . **v**

Plenary Session **1**

Operations Research: A Powerful and Versatile Discipline **3**
Elise del Rosario

Some Results on Edge Coloring Problems with Constraints in Graphs **6**
Guizhen Liu, Jianfeng Hou

Towards Digital Archive Systems: Architecture and Design of Digital Museum Archive **15**
Hiroyuki Kawano

Parallel Sessions **23**

A Joining Shortest Queue with MAP Inputs **25**
Zhaotong Lian, Wenhui Zhou, Baohe Su

Some Properties of Semi-E-Convex Function and Semi-E-Convex Programming **33**
Xiusu Chen

On the Independence Number of the Generalized Petersen Graph $P(n,k)$ . . . **40**
Lian-Cheng Xu, Yuan-Sheng Yang, Zun-Quan Xia, Jing-Xi Tian

Social Behavior in the Simulation of Iterated Prisoner's Dilemma **46**
Hong-Wei Zhang, Kuan-Kuan Zhou, Neng-Bing Hu

Approximation Schemes for Scheduling on Parallel Machines with GoS Levels **53**
Weidong Li, Jianping Li, Tongquan Zhang

A Nonmonotone Trust Region Algorithm Model for Minimization of Locally Lipschitzian Functions **61**
Yan Wu, Hou-chun Zhou

Approximation Algorithms for Embedding a Weighted Directed Hypergraph on a Mixed Cycle **67**
Jianping Li, Weidong Li, Jianbo Li, Juanping Zhu

Multi-criteria Student Project Allocation: A Case Study of Goal Programming Formulation with DSS Implementation **75**
Li Pan, Sydney C. K. Chu, Guangyue Han, Joshua Z. Huang

Approximating Bounded Degree Maximum Spanning Subgraphs **83**
Wangsen Feng, Hao Ma, Bei Zhang, Hanpin Wang

A New Constructive Proof to the Existence of an Integer Zero Point of a Mapping with the Direction Preserving Property **90**
Chuangyin Dang, Guixian Zhong

Numerical Computation for Demyanov Difference of Polyhedral Convex Sets **97**
Chun-Ling Song, Zun-Quan Xia, Zhen-Sheng Chen

An Application of MILP-based Block Planning in the Chemical Industry . . . **103**
Hans-Otto Günther

Scheduling with Rejection to Minimize the Total Weighted Completion Time . **111**
Shu-Xia Zhang, Zhi-Gang Cao, Yu-Zhong Zhang

Certainty Equivalent in Portfolio Management **115**
Xiao-Song Ding, Xi Chen, Ji-Hong Zhang

Generalized Weber Model for Hub Location of Air Cargo **124**
Daisuke Watanabe, Takahiro Majima, Keiki Takadama, Mitujiro Katuhara

MIP-Based Approaches for Solving Scheduling Problems with Batch Processing Machines **132**
Udo Buscher, Liji Shen

Sensitivity and Approximation of $M/G/c$ Queue: Numerical Experiments . . **140**
Yang Woo Shin, Dug Hee Moon

Model of Integrated Chance Constraints and Application on Risk Measure . . **148**
Xiaoxia Rong, Yiming Yan

Routing by Mixed Set Programming **157**
Jianyang Zhou

Total Coloring of Planar Graphs without Adjacent 4-cycles **167**
Xiang Tan, Hong-Yu Chen, Jian-Liang Wu

A Note on The Linear Arboricity of Planar Graphs without 4-Cycles **174**
Jian-Liang Wu, Jian-Feng Hou, Xiang-Yong Sun

A Tabu Search Algorithm to Construct BIBDs Using MIP Solvers **179**
Daisuke Yokoya, Takeo Yamada

Solution of Large-scale LP Problems Using MIP Solvers: Repeated Assignment Problem **190**
Daisuke Yokoya, Takeo Yamada

Analysis of Energy Consumption in 159 Countries by Triangular Pyramid Diagram **198**
Kotoh Hiroshi, Yanai Hiroshi

How Many Routes Can Be Removed in Airline Network? **206**
Hozumi Morohosi

Study of Water Resource Allocation Mechanism Design **212**
Xi Xia, Jin-Chuan Cui

Performance Analysis for Power Saving Class Type II in IEEE 802.16e for Wireless MAN **220**
Shunfu Jin, Ranran Li, Wuyi Yue

A Heterogeneous Two-Server Queueing System with Balking and Server Breakdowns **230**
Dequan Yue, Wuyi Yue, Jun Yu, Ruiling Tian

The Container Shipping Network Design under Changing Demand and Freight Rates **245**
Chen Chao

Entropy Methods for Equilibrium Programming with Its Application in Traffic **263**
Baibai Fu

A New Model and Calculation of Available Transfer Capability With Wind Generation **270**
Xiaojiao Tong, Chunping Liu, Xiao Luo, Renjun Zhou

An Efficient Asynchronous Parallel Evolutionary Algorithm Based on Message Passing Model for Solving Complex Nonlinear Constrained Optimization **280**
Hao Wu, Chunlin Xu, Xiufen Zou

An Dynamic Lot-Sizing Model with Multi-Mode Shipments **290**
Yu-Zhong Zhang, Ru-Zhen Yan, Wei Gao

On the Eigenstructure of Hermitian Toeplitz Matrices with Prescribed Eigenpairs **298**
Zhongyun Liu, Jing Li, Yulin Zhang

A Multi-Item Inventory Control Model for Perishable Items with Two Shelves **306**
Hiroyuki Wakinaga, Katsushige Sawaki

Supply Chain repairable Model with the Multi-suppliers and Single Demander **315**
Xiao-Lin Liang, Mei Liu, Lei Tan

Optimal Impulse Control for Cash Management with Two Sources of Short-term Funds **323**
Kimitoshi Sato, Katsushige Sawaki

A Safety Stock Problem in Battery Switch Stations for Electric Vehicles . . . **332**
Honma Yudai, Kurita Osamu

Optimal Location of Facilities with Limited Capacity **340**
Takamori Ukai

Simulating Growth of Transportation Networks **348**
Tsutomu Suzuki, Yasuhiro Watanabe

Gateway Location Models **356**
Mihiro Sasaki, Takehiro Furuta, Atsuo Suzuki

Integrated Convex Optimization in Banach Space and its Application to Best Simultaneous Approximation **364**
Jin-Shan Li, Xue-Ling Tian

Quantitative Data Analyses for the Recent Change of the Japanese Food Self-Sufficiency Ratios **372**
Kunihisa Yoshi, Ngyen Huu Trung, Tatsuo Oyama

Decycling Number of Circular Graphs **387**
Erling Wei, Yanpei Liu, Zhaoxiang Li

Degree Distribution Analysis of a Random Graph Process Based on Markov Chains **394**
Li Tan, Zhenting Hou, Xiangxing Kong, Qinggui Zhao

Minimizing Total Weighted Completion Time on Uniform Machines with Unbounded Batch **402**
Cuixia Miao, Yu-Zhong Zhang, Jianfeng Ren

A Study of First-price Sealed-bid Procurement Auctions for Divisible Items . **409**
Yihua Wei, Qiying Hu, Wuyi Yue

An Evolving Network Model With Local-World Structure **417**
Li Tan, Xiangxing Kong

Performance Analysis of Geom^X/G/1 Queue with Exhaustive Service Rule and Multiple Vacations **424**
Zhanyou Ma, Wuyi Yue, Naishuo Tian

Double Exponential Jump Diffusion Processes and Its Application to Real Options **436**
Atsuo Suzuki, Katsushige Sawaki

Multi-Agents Scheduling and Routing Problem with Time Windows and Visiting Activities **442**
Hiroyuki Kawano, Masahiro Kokai

An Implementation of a 5-term GFSR Random Number Generator for Parallel Computations **448**
Hajime Miyazawa, Masanori Fushimi

Evaluation of Capacities of Refuges in Urban Areas by Using Dynamic Network Flows **453**
Naoyuki Kamiyama, Atsushi Takizawa, Naoki Katoh, Yuto Kawabata

Shift Scheduling Problems in Nanzan University Entrance Examinations — Their Formulation and Implementation **461**
Atsuo Suzuki1, Kana Yamamoto, Naomi Ito, Masanori Fushimi

Path and Cycle Factors of Cubic Graphs **469**
Cai-Feng Du

On Universum-Support Vector Machines **473**
Ting-Ting Gao, Zhi-Xia Yang, Ling Jing

Multi-instance Support Vector Machine Based on Convex Combination . . . **481**
Zhi-Xia Yang, Naiyang Deng

An Extension of Recurrent Iterated Function System — From the Viewpoint of Graph Theory and Product Space **488**
Li Wang, Zhen-Ping Li

Author Index **495**
